Titles

Algebraic modelling of pattern design: the abelian pattern semi-group, NG, R., CHAN, C.K., PONG, T.Y. and AU, R., No. 5, pp. 33-43.

Communications: an analysis of the apparel pattern-making process, KOH, T.-H., LEE, E.-W. and LEE, Y.-T., No. 4, pp. 54-64.

Communications: quick response in clothing merchandising – a study of the buying office using network analyses, LEUNG, C.-S. and YEUNG, M., No. 5, pp. 44-55.

Computer-aided designers? A study of garment designers' attitudes towards computer-aided design, HARDAKER, C.H.M. and FOZZARD, G.J.W., No. 4, pp. 41-53.

Computer-aided processes on garment production: features of CAD/CAM hardware, STJEPANOVIĆ, Z., No. 2/3, pp. 81-8.

Environmentally friendly dyeing of synthetic fibres and textile accessories, KNITTEL, D. and SCHOLLMEYER, E., No. 1, pp. 36-45.

FAST – Fabric Assurance by Simple Testing, MINAZIO, P.R., No. 2/3, pp. 43-8.

Format for human body modelling from 3-D body scanning, JONES, P.R.M., LI, P., BROOKE-WAVELL, K. and WEST, G.M., No. 1, pp. 7-16.

Garment sewing processing parameters: determination using numerical methods and computers, ROGALE, D., No. 2/3, pp. 56-60.

Importance of mechanical and physical properties of fabrics in the clothing manufacturing process, SHISHOO, R.L., No. 2/3, pp. 35-42.

Influence of some parameters on stitching velocity of sewing, LOJEN, D.Z., No. 2/3, pp. 111-19.

International Textile and Clothing Research Register, STYLIOS, G. (compiler), No. 6 (special issue).

Markets, technology and skills: teamworking and competitive advantage in the apparel industry, TOTTERDILL, P., No. 2/3, pp. 24-34.

Modelling the dynamic drape of fabrics on synthetic humans: a physical, lumped-parameter model, STYLIOS, G., WAN, T.R. and POWELL, N.J., No. 5, pp. 10-25.

(A) neuro-fuzzy control system for intelligent overlock sewing machines, STYLIOS, G. and SOTOMI, J.O., No. 2/3, pp. 49-55.

(A) new approach to fabric assessment, AMIRBAYAT, J. and ALAGHA, M.J., No. 1, pp. 46-54.

Objective evaluation of a stabilized garment parts handle, GERŠAK, J. and ŠARIĆ, A., No. 2/3, pp. 102-10.

Physiological and perceptual responses to forearm immersion in cold water, SHANLEY, L.A., PASCOE, D.D., ANDERSON, L. and BELLINGAR, T., No. 5, pp. 26-32.

Quick response – ten years later, HUNTER, N.A. and VALENTINO, P., No. 4, pp. 30-40.

Resistance to creasing of clothing, wool fabrics, MIHAILOVIĆ, T.V., NIKOLIĆ, M.D. and SIMOVIĆ, L.J., No. 4, pp. 9-16.

Rheological properties of threads: their influence on dynamic loads in the sewing process, GERŠAK, J., No. 2/3, pp. 71-80.

(The) role of decouplers in JIT pull apparel cells, BLACK, J.T. and CHEN, J.C., No. 1, pp. 17-35.

Subjective and objective evaluation of men's shirting fabrics, YICK, K.L., CHENG, K.D.S. and HOW, Y.L., No. 4, pp. 17-29.

Towards automated testing of fabrics, POTLURI, P., PORAT, I. and ATKINSON, J., No. 2/3, pp. 11-23.

Use of mathematical programming for workplace design in sewing rooms, GOTLIH, K., No. 2/3, pp. 61-70.

Workplace design and loadings in the process of sewing garments, BEZJAK, Z. and KNEZ, B., No. 2/3, pp. 89-101.
